## Vole Internet Expedition

One-Click To Get All Your Websites Ready In A Nicely Gallery Format

Vole Internet Expedition is a new generation web browser, a fast and more graceful way to browse the web. Vole Internet Expedition Scene-Reproduce feature reproduces all the websites that you customized automatically, Docking-tabbed feature lets you dock and table your websites as you want. You do not have to manually search, open and close the same websites again and again. You do not have to manually adjust the websites docking and table position again and again. So have a cup of coffee, open the software lets Vole Internet Expedition do all for you, it will save much time for you every day. It is really a faster and more graceful way to browse the web. If you are tired of opening the same websites again and again every day, if you already have your best websites collection, if you do not want to remember the long meaningless URLs, if you want to save more time for coffee, you may try Vole Internet Expedition now!

## FEATURES

### Scene-Reproduce

One-click operate, gets all web pages within any scene ready automatically. Instant navigation and accurate position. Scene-Reproduce feature will automatically save the opened web pages and their docking configuration to your local disk

and will restore the opened web pages same as saved when starts. And more, scene can be exported and imported. If you export your scene and import to as many as other computers, BOOM, all the other computers will open websites same as yours.

## Docking-Tabbed

Docking-Tabbed is premium window control technology that lets you dock and table window as you want, Parallel, Vertical, Horizontal, Float, Horizontal Group, Vertical Group, Prominent, etc. This lets you view your web pages more convenient than ever. Most of the software you can imagine cannot provide this complicated feature, such as Windows, Office, iTunes, etc. Up to now, any other web browsers don't have this feature.

## Five-level Topology & Multi-Process Mode

Web pages, categories, projects, scenes and scene manager five-level topology structure, the heaviest loaded web browsers. Vole Internet Expedition can open these huge number of web pages in single process like Firefox or multi-process like Chrome.

## Scenes Synchronize

The software supports scenes synchronize data via Scene Export and Scene Import command. Scenes synchronize supports between setup editions and portable editions. So you can import scenes from your work laptop into your home desktop when go home. Or you can import scenes from your workmates. The built-in VIE Examples is just a scene export from our PC. You

can import it into your PC when click it. Imagine, open all preset websites in gallery style in the scenes without typing a word! That is Great!

### Multiple Featured Themes

More than 10 beautiful featured themes relax your eyes; they are: Office 2007, Office 2010, Office 365, Sparkle themes , etc.

### Super-Fast

On the same condition, all of them are the latest versions, and Vole Internet Expedition won the test against mainstream web browsers.

**Test Results:**

Vole Internet Expedition	6.98s
Chrome	9.21s
Edge	10.08s
FireFox	16.11s

**WINNER**

## Advance (A)

### MD5

The MD5 message-digest algorithm is a widely used cryptographic hash function producing a 128-bit (16-byte) hash value, typically expressed in text format as a 32 digit hexadecimal number. MD5 has been utilized in a wide variety of cryptographic applications, and is also commonly used to verify data integrity.

The software uses the MD5 algorithm verification document. No matter how the file name or attributes change, if the MD5 value same the file contents are same.

### GUID

GUID creator. GUID - globally unique identifier is a unique reference number used as an identifier in computer software.

### Base64
